To Whom It May Concern,

I am writing to provide my highest recommendation for Solomon Tesfaye Ensermu in support of his future academic and professional pursuits. As both his instructor and the Program coordinator (head) of the Computer Science Department, I have had the distinct pleasure of overseeing his academic trajectory and evaluating his exceptional capabilities firsthand.

Throughout his time in our program, Solomon consistently distinguished himself as a top-tier student. I had the privilege of teaching him advanced, mathematically rigorous coursework, including *Design and Analysis of Algorithms and Computer Vision and Image Processing*.

In the classroom, Solomon was a deeply engaged, analytical thinker who consistently pushed past standard course requirements to explore complex algorithmic concepts independently.

Beyond standard lectures, I supervised Solomon on several technical projects. He was also founder member and chairperson of Jimma University cyber club. In this capacity, he demonstrated an outstanding ability to translate abstract theory into highly functional, real-world applications.

Given his technical acumen, work ethic, and leadership potential, I am entirely confident that Solomon will bring immense value to any advanced academic program or professional organization he join.

Please do not hesitate to contact me at fiden.worku@ju.edu.et if you require further insights into his qualifications.

Sincerely,
Mamo Fiden Worku
Faculty of Computing &
Informatics
Program Coordinator
